 - Tartu City Government
 - City of Riga
- Baltic Environmental Forum Latvia
 - The City of Vāxjö
 - Šiauliai City Municipality
 - Olsztyn Municipality
- Earth and People Foundation

SU BA

WHY DO WE NEED SUMBA?

More and more people chose to live in suburbs while they continue to work in cities, resulting in high number of daily commuters. Commuter traffic is still dominated by private cars, resulting in problems such as

- congestion
- air pollution
- high demand of parking spaces
- higher costs of public transport.

SUMBA will address commuter transport and help to mitigate these problems!

OUR ACTIVITIES

The urban transport system can be reshaped to an intermodal network that offers a combination of various transport modes, including bike and car-sharing. This helps cities to achieve a more attractive and environmentally friendly commuting system. SUMBA will develop and test tools that help urban and transport planners to assess, plan, and integrate intermodal mobility solutions into transport plans and policies of their cities and municipalities.

Our innovative tools will be tested in the following regions:

- Hamburg (Germany)
- Tallinn city, Harju county and Tartu (Estonia)
- Riga (Latvia)
- Växjö (Sweden)
- Šiauliai (Lithuania)
- Olsztyn (Poland)
- Associated cities Gdynia, Warsaw suburban region, Słupsk municipality (Poland), and Helsinki (Finland).

Duration: **10/2017 – 09/2020**

Total budget: **3.1 million EUR**
