Project area in Latvia - Riga region

Riga region:

Riga – capital city of Latvia

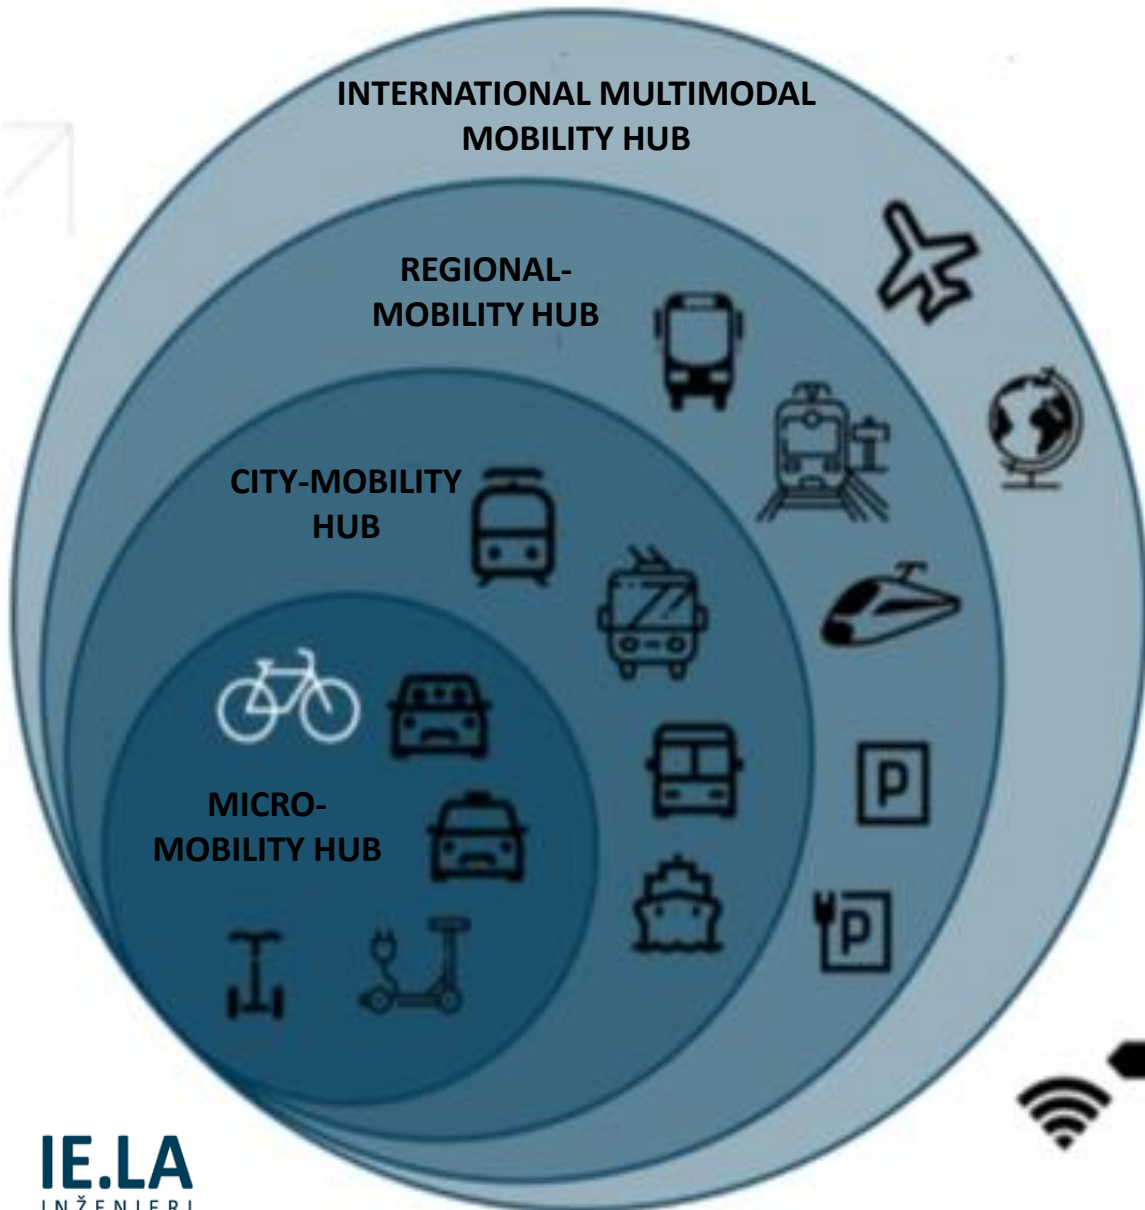

Pierīga region

Impact area of Rīga and Pierīga

Main SUMBA activities in Riga region:

- Commuting Master Plan for Riga region
- Transport modelling and data collection in Riga
- INTERMODALYZER tool testing and dissemination
- Development of mobility hub concept
- Several stakeholder events

Mobility hub concept

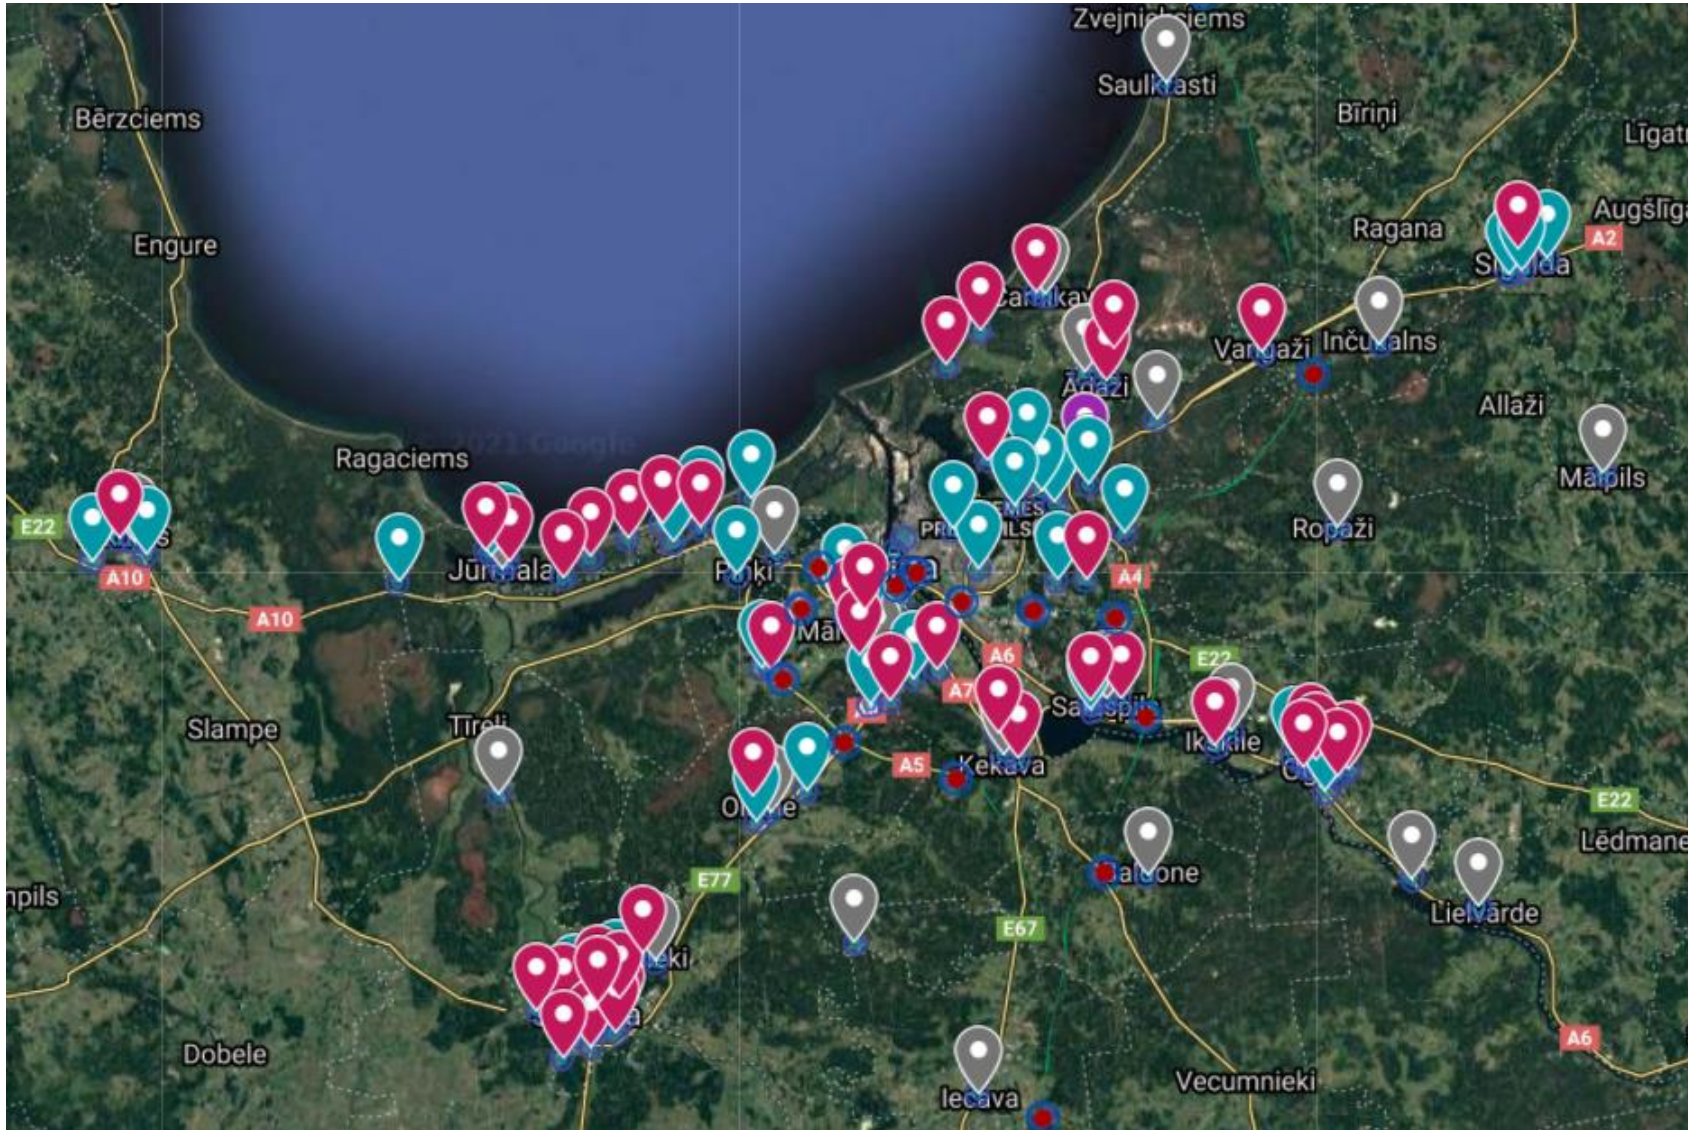

Scale →

- International
- Regional
- Local (city level)
- Micro (very local)

Indicative mobility hub locations in Riga region

- 3 international
- 26 regional
- 35 local (city level)
- 43 micro (very local)

Where already used:

- Included in National Transport Development Guidelines (2021-2027)
- Used in mobility infrastructure investment application preparation (*Elena program*)
- Used in urban planner capacity building webinar
- Established in Region planning documents
- Disseminated internationally and nationally

Future perspective of mobility hubs

- Further feasibility studies in SUMBA+
- Continue replication activities (and interdisciplinary cooperation)
- Further use in investment applications
- Further establishment in regional planning documents
- Dissemination activities

Thanks for your attention!
